

Main Features

- 8 inch and 5 inch 2-way powered speakers with 1 inch soft-dome tweeter
- Dynamically curved waveguide enclosure provides a wider pattern for better imaging and staging
- Bass Reflex enclosure extends the lower frequency range to provide more mid-bass and bass output
- Includes a control knob accessory to allow users to operate the volume, power, and switchable inputs
- Four switchable input channels for various devices

S-DJ08

S-DJ05

FEATURES

1 Audio Quality

The compact speakers achieve a larger than normal listening area due to the use of a curved waveguide enclosure that directs the soft-dome tweeter's sound in a wider pattern for better imaging and staging. This means more listeners across a larger area of a room can hear the higher frequencies than with traditional designs. Additionally, the Bass Reflex enclosure extends the lower frequency range to provide more mid-bass and bass output. In order to reproduce the highest quality audio possible, the speakers are also equipped with strong 10cm high-force magnets (S-DJ08) for better control of the subwoofers, a low resonance chimney-style heat sink and a bi-amp circuit that drives the tweeter and woofer separately.

Whether the speakers are utilized for DJing or producing music, the built-in linear equalizer provides further fine-tuning of sound for all listeners' tastes. The linear equalizer allows users to adjust the low and high bands from -6 dB to +6dB helping to enhance the tonal quality of instruments while producing music or recreate the low frequency sound of a club while DJing for a more realistic experience, important for critical listeners.

2 Control Knob Accessory

Unique to Pioneer's DJ speakers, the included control knob accessory allows users to simultaneously operate the volume, power and four switchable input channels of both speakers. The dial style control knob also engages the equalizer and muting of both speakers.

Controller

3 Four Switchable Input Channels For Various Devices

Both S-DJ08 and S-DJ05 speakers feature four types of inputs (XLR, TRS and two sets of RCA) that let users connect various devices simultaneously, such as a computer, DJ equipment, portable device, etc. The various inputs eliminate the need to change cable connections so the speakers can be utilized with a broad variety of sources.

Rear panel (same for S-DJ08 and S-DJ05)

4 Additional Features

The speakers also feature an environmentally-friendly Auto Standby feature that automatically detects input signals and switches the standby mode when input is not detected within 60 minutes. For additional functionality, bottom screw holes were implemented for use with commercially available stands.

SPECIFICATIONS

S-DJ08

Type	Bi-amp 2-way powered speakers
Tweeter	2.5 cm soft dome tweeter
Woofer	8 inches
Frequency characteristics	43 Hz to 26 kHz (-10 dB)
Input terminals	
Balanced input	XLR x 1, TRS (1/4 inch PHONE) x1
Unbalanced input	RCA x 2
Maximum external dimensions (W x H x D)	9.84" x 15.39" x 14.61" (including heat sink)
Weight (for pair)	59.52 lbs
Accessories	controller x 1, link cable x 1, power cables x 2, rubber feet x 8

S-DJ05

Type	Bi-amp 2-way powered speakers
Tweeter	2.5 cm soft dome tweeter
Woofer	5 inches
Frequency characteristics	50 Hz to 25 kHz (-10 dB)
Input terminals	
Balanced input	XLR x 1, TRS (1/4 inch PHONE) x1
Unbalanced input	RCA x 2
Maximum external dimensions (W x H x D)	7.28" x 11.85" x 10.16" (including heat sink)
Weight (for pair)	29.54 lbs
Accessories	controller x 1, link cable x 1, power cables x 2, rubber feet x 8
