

ELITE

SX-A9-J

STEREO RECEIVER FOR CRITICAL LISTENING

POWER

- › 70W Per Channel x 2

PERFORMANCE FEATURES

- › Symmetrical, Dual Mono Amplifier and Power Supply Construction
- › **Dual Toroidal Based Mechanically Isolated Power Supply** for Fast Response and Low Noise
- › **Adoption of a Schottky barrier diode**, a majority carrier device. This gives it tremendous advantages in terms of speed. The Schottky diode also has a much higher current density than an ordinary diode making the diode ideal for use in power supply applications
- › **Class A/B Amplifier Stages featuring LAPT Output Transistors.** LAPT output transistors are high-speed output transistors that operate over an extremely broad frequency range and produce minimal distortion even when handling large amounts of current
- › Ultra Rigid Honeycomb Chassis Construction
- › Sound Retriever Technology for Enhanced MP3/AAC File Playback
- › Curved Profile Brushed Aluminum Front Fascia
- › Large Gold Plated Multi-Way Binding Posts
- › Air Studios Audio Tuning

FORMATS

- › USB Input
- › XM® Satellite Radio Ready*
- › MM/MC Phono Input
- › AM/FM Tuner

*XM Connect-and-Play antenna and subscription service (each sold separately) required to receive XM and XM-HD Surround Radio.
