

Third Party Companies Supporting Pioneer CD-ROM Drives

"Customers must contact the companies for product specifications and pricing"

"Listing these companies does not constitute a recommendation by Pioneer. It is the responsibility of the customer to contact the companies to determine which product meets specific needs."

SOFTWARE SUPPORTING DRM-600a, DRM-602x and DRM-604x

Company	Pioneer Changer	Platform
Acorn Software 508-568-1618	DRM-600	VMS VAX
	DRM-602x	
	DRM-604x	
	DRM-624x	

Name: **Virtual Branches**

Features: VMSINSAL capabilities, transparent disk drive allocation, virtual disk drive allocation, virtual disk volumes appear simultaneously mounted and available for stand alone, supports VMS Backup. Compatible with CMD Technology Fast SCSI-2 host adapters and interface boards for Digital's Q-Bus, DSSI, VAXBI, CI and SCSI and supports multivendor VMS database applications.

Company	Pioneer Changer	Platform
Adaptec 408-945-8600	DRM-600a	DOS, Windows 3.x, Windows95, IBM
	DRM-602X	
	DRM-604X	
	DRM-624X	

Name: **EZ-SCSI**

Features: Includes Photo CD viewer (Magic Lantern), Adaptec CD Player, Mini CD Player, SCSI Inergrator.

Company	Pioneer Changer	Platform
Asimware 905-578-4918	DRM-600	Amiga
	DRM-604x	
	DRM-624X	

Name: **AsimCDFS**

Features: Contact company

Company	Pioneer Changer	Platform
Celerity Systems 800-558-1901	DRM-602x DRM-604x DRM-624X	DOS, Windows Novell, Windows NT, NFS-TCP/IIP, IPX, OS/2, Mac-OS

Name: CD Workware

Features: Receives mainframe print pool data and scans documents with optical character recognition (OCR). Indexes and distributes data automatically. Built-In access control. Enterprise-wide access to archived information.

Name: Virtual CD Driver

Features: Low- overhead access to 235 discs with only 16MB of ram with no dedicated CD Changer server required. CDs appear as sub-directories. ASPI compatible SCSI card required.

Company	Pioneer Changer	Platform
Corel 800-772-6735	DRM-600 DRM-602x DRM-604x DRM-624X	DOS, Windows, Novell

Name: Corel SCSI Network Manager

Features: Transparent integration of Pioneer drives with NewWare file server. Allows the drives to appear as extensions of the network volume. Allows for mapping of directories. Compatible lists are updated monthly and available from BBS. Includes Corel RAID data security software.

Company	Pioneer Changer	Platform
Instar 403-264-7274	DRM-602x DRM-604x DRM-624X	SUN, Solaris

Name: CD-SOL

Features: CD-SOL interfaces Pioneer's 6 disc CD-ROM changers with SUN computers. Fully transparent UNIX operation with built-in-caching and scheduling for increased performance and minimal disc thrashing. Includes: a changer device driver: a GUI menu driven installation program: Diagnostics installation program: a detailed user manual. Capable of supporting up to 99 changers per host computer.

Company	Pioneer Changer	Platform
Intraco 407-367-0600	DRM-602x DRM-604x DRM-624X DRM-624X	VMS 5.4, VAX, VMS AXP 1.5 or later, ULTRIX 4.2 or later, OSF/1 AXP

Name: **IS104X-DR/VMS**

Features: CD-ROM Library VAX/VMS Drivers only. One driver license required for each CPU. For VAX stations and Micro VAXes with imbedded Digital SCSI DK controllers for special Q-bus controllers.

Name: **IS104X-DR/HP97**

Features: CD-ROM Library HP/UX Drivers only for HP9000 Series Workstations. One driver license required for each CPU.

Name: **IS104X-DR/ULT**

Features: CD-ROM Library ULTRIX/RISC Drivers only. One driver license required for each CPU.

Name: **IS104X-DR/OFS**

Features: CD-ROM Library OFS / 1 Drivers only, for Alpha AXP. One driver license required for each CPU.

Company	Pioneer Changer	Platform
Jodian Systems 703-631-7741	DRM-600 DRM-602x DRM-604x DRM-624X	IBM: RS/6000-AIX, HP9000 Model 7xx, HP-UX Sun Microsystems, SunSPARC, SunOS/Solaris, DEC Alpha, OSF/1

Name: **CDMGR**

Features: Please contact Jodian Systems Software.

Company	Pioneer Changer	Platform
Logicraft 603-880-0300	DRM-600x DRM-602x DRM-604x DRM-624X	DOS, Novell, IPX/SPX, TCP/IIP, Banyan and NetBIOS

Name: LanCD

Features: Allows asynchronous access to CD-ROM drives. Supports up to 4 different network protocols simultaneously. Provides FastCD utilities which allows users to access CD-ROM applications from harddisks, creating "virtual CD-ROM disks" on physical SCSI hard drives.

Company	Pioneer Changer	Platform
Microtest 800-526-9675	DRM-602x DRM-604x DRM-624X	Novell Netware

Name: Discport/Discview & Discserve/Discview

Features: Disc port is a hardware device that allows up to seven changers to be connected directly to a network. Discview and Discserve are software packages that allows easy installation, configuration and mounting of CD-ROM from any workstation on the network. Allows any user on Novell network to see and access entire libraries of CD-ROMs.

Company	Pioneer Changer	Platform
Optical tech. Group 301-897-1400	DRM-602x DRM-604x DRM-624X	Windows NT

Name: Disc Extender & CD Extender

Features: Disk extender is an advanced mass storage server with intelligent mounting, caching, security and virtual file system support. CD Extender is a CD-ROM read-only server and network library manager with intelligent mounting, caching, security and virtual file support. With both packages, users connect to the server as a network share and view all media as one or more sub-directories under a selected drive.

Company	Pioneer Changer	Platform
Optisys 800-327-1271	DRM-600 DRM-602x DRM-604x DRM-624X	DOS, Novell, Artisoft, Bayan, 3Com and more

Name: OptiDriver CD

Features: Allows users to assign one DOS drive letter to each platter, or one DOS drive letter top an entire autochanger and have the volume label appear as a root directory entry. When combined with OptiLAN, allows jukeboxes to be shared across a wide variety of networks.

Company	Pioneer Changer	Platform
Smart Storage 508-623-3300	DRM-600 DRM-602x DRM-604x DRM-624X	DOS, Novell, IPX, NetBIOS, Banyan, SPP, UNIX NFS

Name: **SmartCD Archive**

Features: This software sees each unit as a single drive with separate sub-directories.

Name: **Smart CD Library**

Features: This software sees each CD-ROM within the unit as a separate volume.

Company	Pioneer Changer	Platform
Tracer Technologies 301-977-9400	DRM-602x 2 DRM-604x DRM-624X DRM-604X	AIX, ULTRIX, SunSPARC, Sol1, Sol

Name: **HyperROM**

Features: HyperROM allows access to CD's via native workstations file managers. CDs can be grouped in file systems for convenient client access and system administration. All CS data and databases are stored on the system disk for quick access. Transparent changing. Server platform can be any SPARC 4C or 4M workstation.

Name: **HR-07D and HR-07S for SUN OS AIX, Alpha, OFS1, IRIX and HPUX**

Features: H-07D is a single workstation version which consists of a device driver that makes the changer look like six independent CD-ROM drives. It provides for transparent, on-demand platter changing.

The HR-07S is a server version which includes the above along with Tracers HyperROM file System. The HyperRom file system allows tunable caching and pre-fetching on a per CD basis, along with menu driven browsing.

301-977-1398

Company	Pioneer Changer	Platform
Young Minds 909-335-1350	DRM-604x DRM-624X	AIX-SUN/OS, Solaris, SCO HP9000, Microport (SVR4) Unixware

Name: **Ultra Capacity**

Features: Discs can be configured to appear at a single mount or at multiple mount points. Supports ISO 9660, Rock Ridge & High Sierra formats.
