**About this manual:**

- In the following instructions, a USB memory or USB audio player are referred to as “USB device”.
- When an iPhone is connected to the unit, the source name on the unit appears as [iPod]. Please note that this unit supports only iPhones (iPhone 5s or later) regardless of the source name (page 28).
Getting Started

Basic operation

SPH-10BT

Optional remote control
The remote control CD-R510 is sold separately.

* When this unit’s blue/white lead is connected to the vehicle’s auto-antenna relay control terminal, the vehicle’s antenna extends when this unit’s source is turned on. To retract the antenna, turn the source off.

**Detaching the front panel**

Detach the front panel to prevent theft. Remove any cables and devices attached to the front panel and turn off the unit before detaching it.

**Detach**

**Attach**

**Important**

- Avoid subjecting the front panel to excessive shock.
- Keep the front panel out of direct sunlight and high temperatures.
- Always store the detached front panel in a protective case or bag.

**Resetting the microprocessor**

The microprocessor must be reset in the following situations:
- Before using this unit for the first time after installation
- If the unit fails to operate properly
- When strange or incorrect messages appear on the display

1. Remove the front panel (page 4).
2. Press the **RESET** button with a pointed instrument longer than 8 mm.
WARNING

• Do not use the built-in holder if your smartphone would cover, obscure or block indicators (lamps) relating to vehicle system status and operation, such as Passenger Air Bag status lamps, Air Bag Malfunction lamp, Anti-lock Braking System status, Electronic Stability Control (ESC) status, Hazard lamp activation, and controls related to heating, ventilation, air-conditioning and defrost functions and any related vents and fans. If you encounter any of these issue, use an appropriate alternate mounting device to secure the smartphone in a location that does not block indicators, controls or vents, violate the law, or cause a hazard.

• Mount, remove, and adjust the smartphone and its orientation (vertical or horizontal) only when safely parked.

• Before driving, make sure the smartphone is mounted securely so it does not separate from the mounting device during a sudden stop. Do not use the built-in holder if it is difficult to securely attach your smartphone to it or if bad road conditions could cause the smartphone to separate or fall from it.

• Do not leave the smartphone in the built-in holder when leaving your vehicle.

• Be careful not to get your hands or fingers caught in the moving parts while operating the built-in holder.

Removing the smartphone holder

1 Detach the front panel (page 4).

2 Pull out the holder by holding the anti slip portion on the edge of the holder until the holder is completely visible.

CAUTION

Never pull up the holder until the holder is completely visible.

3 Pull up the holder vertically.
CAUTION
Make sure that the line can be seen when the holder is pulled up vertically.

4 Attach the front panel to the unit (page 4).

Adjusting the smartphone holder horizontally
1 Slide the holder while the holder is in a horizontal position.
2 Pull up the holder.

**NOTE**
Detach the smartphone from the device while adjusting the holder.

**Attaching the smartphone to the holder**

**CAUTION**
- Depending on the shape of the smartphone, smartphone case or cover, it may not be attachable to the holder.
- Be careful not to pinch your fingers.

Compatible smartphone size
H: 2.28 in. - 6.69 in. (58 mm - 170 mm)
W: 2.28 in. - 3.42 in. (58 mm - 87 mm)
D: 0.15 in. - 0.39 in. (4 mm - 10 mm)
Weight: under 0.55 lbs (0.25 kg)

1 Hook the smartphone on the upper arm and then push it into the lower arm.
2 Slide the lower arms position to avoid hitting the lower arm and smartphone buttons against each other.

NOTES
- Make sure that the smartphone is held properly on the holder.
- When the smartphone buttons come in contact with the upper or lower arms, adjust the smartphone's position or turn the smartphone upside down.
Adjusting the smartphone holder

Adjusting the holder angle

The holder angle range:
Downward 45° to upward 100°

⚠️ WARNING
Do not set the holder where it may (i) interfere with vehicle panels or switches or (ii) impair the driver’s performance.

Turning the smartphone holder from a horizontal to a vertical position
1 Rotate the smartphone holder 90° clockwise.

⚠️ CAUTION
Be careful to not drop the smartphone when the smartphone is attached to the holder while rotating.

Turning the smartphone holder from a vertical to a horizontal position
1 Rotate the smartphone holder 90° anticlockwise.
CAUTION
Be careful to not drop the smartphone when the smartphone is attached to the holder while rotating.

Detaching the smartphone from the holder

1 Pull out the smartphone while pushing up the upper arm with the smartphone.

CAUTION
• Be careful to not drop the smartphone.
• Do not use the holder when the smartphone is detached.

Storing the smartphone holder

1 Detach the front panel (page 4).
2 Fold the holder horizontally.

3 Push the holder completely into the unit.
4 Attach the front panel to the unit (page 4).

**INITIAL settings**

1. Press and hold  until the unit turns off.
2. Press and hold  to display the main menu.
3. Press  to select [INITIAL], then press  to confirm.
4. Press  to select an option, then press  to confirm.

</table>
Radio

Receiving preset stations

1. Press \( \text{\( \text{\( \uparrow \)}} \)\) to select [RADIO].
2. Press \( \text{\( \text{\( \downarrow \)}} \)\) to select the band from [FM1], [FM2], [FM3] or [AM].
3. Press \( \text{\( \text{\( < \)}} \) or \( \text{\( \text{\( > \)}} \).

TIP
The \( \text{\( \text{\( < \)}} \) or \( \text{\( \text{\( > \)}} \) buttons can be also used to select a preset station when [SEEK] is set to [P.CH] in the FUNCTION settings (page 20).

Best stations memory (BSM)

The six strongest stations are stored then select the channel by pressing \( \text{\( \text{\( < \)}} \) or \( \text{\( \text{\( > \)}} \).

1. After selecting the band, press and hold \( \text{\( \text{\( \downarrow \)}} \)\) to display the main menu.
2. Press \( \text{\( \text{\( > \)}} \) to select [FUNCTION], then press \( \text{\( \text{\( \uparrow \)}} \)\) to confirm.
3. Press \( \text{\( \text{\( > \)}} \) to select [BSM], then press \( \text{\( \text{\( \downarrow \)}} \)\) to confirm.

To seek a station manually

1. After selecting the band, press \( \text{\( \text{\( < \)}} \) or \( \text{\( \text{\( > \)}} \) to select a station.
   Press and hold \( \text{\( \text{\( < \)}} \) or \( \text{\( \text{\( > \)}} \) then release to seek an available station. Scanning stops when the unit receives a station. To cancel seek tuning, press \( \text{\( \text{\( < \)}} \) or \( \text{\( \text{\( > \)}} \).

NOTE
[SEEK] needs to be set to [MANUAL] in the FUNCTION settings (page 20).

To store stations manually

This function is only available on Pioneer Smart Sync (page 16). For details, see the application's help section.
Disconnected headphones from the device before connecting it to the unit.

**USB devices (including Android™)/iPhone**

1. Open the USB port cover.
2. Plug in the USB device/iPhone using an appropriate cable.

**NOTES**

- To automatically switch to USB source when a USB device/iPhone is connected to the unit, set [USB AUT] to [Y] in the SYSTEM settings (page 23).
- To use iPhone source, [APP CTL] needs to be switched to the appropriate settings (page 23).

**CAUTION**

Use a USB cable (sold separately) to connect the USB device as any device connected directly to the unit will protrude out from the unit, which could be dangerous.

Before removing the device, stop playback.

**AOA connections**

A device running Android OS 4.1 or later installed and also supports AOA (Android Open Accessory) 2.0 can be connected to the unit via AOA, using the cable supplied with the device.

**NOTE**

If you use an AOA connection, [APP CTL] needs to be set to [WIRED] in the SYSTEM settings (page 22).

**Operations**

You can make various adjustments in Pioneer Smart Sync (page 16).

<table>
<thead>
<tr>
<th>Purpose</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select a folder*1</td>
<td>Press ★★.</td>
</tr>
<tr>
<td>Select a track/song (chapter)</td>
<td>Press &lt; or &gt;.</td>

<tr>
<td>Fast forward or reverse*2</td>
<td>Press and hold &lt; or &gt;.</td>
</tr>
</tbody>
</table>

*1 Compressed audio files only
*2 When you use the fast forward or reverse function while playing a VBR file, the playback time may be not correct.
Bluetooth

Bluetooth connection

 Rif  Important
If ten or more Bluetooth devices (e.g. a phone and separate audio player) are connected, they may not work properly.

 Rif  TIP
The next connection to the unit is performed automatically if the Bluetooth device has been connected previously in the following steps.

1 Turn on the Bluetooth function of the device.
2 Select the unit name shown in the device display.
3 Make sure the same 6-digit number appears on this unit and the device, then select [Y] if the 6-digit numbers displayed on this unit and the device are the same.

Bluetooth reconnection
Once the Bluetooth connection is established with the device, you can connect the device from the unit.

1 Turn on the Bluetooth function of the device.
2 Press \. 
   [DEV LIST] appears.
3 Press > to select the device.
4 Press ▶ to confirm.

Bluetooth telephone
First, make a Bluetooth connection with the Bluetooth telephone (page 14). Up to two Bluetooth telephones can be connected simultaneously.

 Rif  Important
• Leaving the unit on standby to connect to your phone via Bluetooth while the engine is not running can drain the vehicle’s battery.
• Be sure to park your vehicle in a safe place and apply the parking brake before operation.
To make a phone call
This function is only available on Pioneer Smart Sync (page 16). For details, see the application's help section.

To answer an incoming call
1 Press any button when a call is received.

TIP
When two phones are connected to the unit via Bluetooth and there is an incoming call while one phone is being used for a call, a message will appear in the display. To answer that incoming call, you need to end the existing call.

Basic operations
You can make various adjustments in Pioneer Smart Sync (page 16).

<table>
<thead>
<tr>
<th>Purpose</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>End a call</td>
<td>Press  .</td>
</tr>
<tr>
<td>Reject an incoming call</td>
<td>Press and hold  when a call is received.</td>
</tr>
<tr>
<td>Adjust the volume of the caller's voice</td>
<td>Press  or  during the call.</td>
</tr>
<tr>
<td>(When private mode is on, this function is</td>
<td></td>
</tr>
<tr>
<td>not available.)</td>
<td></td>
</tr>
</tbody>
</table>

Voice recognition
This function is only available when an iPhone/Android device equipped with voice recognition is connected to the unit via Bluetooth.

1 Press  then talk into the microphone to input voice commands.

To exit the voice recognition mode, press and hold  .

NOTE
For details on the voice recognition features, refer to the manual supplied with your device.

Bluetooth audio

Important
- Depending on the Bluetooth audio player connected to this unit, the available operations will be limited to the following two levels:
  – A2DP (Advanced Audio Distribution Profile) can only play back songs on your audio player.
  – AVRCP (Audio/Video Remote Control Profile) can perform functions such as playback, pause, select song, etc.
- The sound of the Bluetooth audio player will be muted when the phone is in use.
• When the Bluetooth audio player is in use, you cannot connect to a Bluetooth telephone automatically.
• Depending on the type of Bluetooth audio player you have connected to this unit, operation and information displayed may vary based on availability and functionality.

1 Make a Bluetooth connection with the Bluetooth audio player.

2 Press 🎧 to select [BT AUDIO] as the source.

3 Start playback on the Bluetooth audio player.

**NOTE**
You must reconnect the Bluetooth connection when the source is switched or the unit is turned off.

**TIP**
When more than two and up to five devices are registered to the unit via Bluetooth, you can switch the Bluetooth device by playing back songs on the device. By doing so, playing back a song from the Bluetooth device of each passenger is easily available. However, depending on the usage conditions, multiple connections may not be available and the audio files/songs may not be able to be played back properly.

---

**Basic operations**

You can make various adjustments in Pioneer Smart Sync (page 16).

<table>
<thead>
<tr>
<th>Purpose</th>

**Using Pioneer Smart Sync/APP**

Pioneer Smart Sync is the application that intelligently brings your maps, messages, and music together in the vehicle.

You can operate the unit from Pioneer Smart Sync installed on an iPhone/Android device. In some cases, you can control aspects of the application, such as source selection, pause, etc., by using the unit.

For details on what operations are available on the application, see the application’s help section.

**NOTE**

The APP source is not available when a Pioneer Smart Sync connection is not made.

⚠️ **WARNING**

Do not attempt to operate the application while driving. Make sure to pull off the road and park your vehicle in a safe location before attempting to use the controls on the application.
For iPhone users
This function is compatible with iOS 10.3 or later.
You can download Pioneer Smart Sync on iTunes® App Store®.

For Android device users
This function is compatible with devices that have Android OS 5.0 or later installed.
You can download Pioneer Smart Sync on Google Play™.

NOTE
Some Android devices connected via AOA 2.0 may not work properly or emit sounds due to their own software design, regardless of the OS version.

What kind of function does the application have?

Promoting the use of the unit
The interface of the unit can be evolved by using your iPhone/Android device.

Image (example):

Examples:
– Selecting a source of the unit
– Listening to the music on your iPhone/Android device
– Controlling the sound field intuitively and setting the illumination colour
## Extending the functions of the unit by using the application

The following functions, which are unavailable on the unit alone, are available by making a Pioneer Smart Sync connection.

<table>
<thead>
<tr>
<th>Menu Item (example)</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using a navigation application</td>
<td>You can specify and start the navigation application installed on your device.</td>
</tr>
<tr>
<td>Message reading</td>
<td>You can read messages received from the apps installed on your device.</td>
</tr>
<tr>
<td>31 Band EQ setting</td>
<td>You can select an equalizer band from the 31-band graphic equalizer.</td>
</tr>
<tr>
<td>Super &quot;Todoroki&quot; Sound</td>
<td>You can boost the bass level more dynamically than when not using the Pioneer Smart Sync connection.</td>
</tr>
<tr>
<td>Easy Sound Fit</td>
<td>You can perform the time alignment setting easily by selecting your vehicle type.</td>
</tr>
<tr>
<td>Theme setting</td>
<td>You can set the wall paper and the theme colour at once.</td>
</tr>
</tbody>
</table>

### NOTES
- Some functions may be restricted depending on the connection conditions with the application.
- The 31 Band EQ setting is converted into 13 bands when a music source from this product is engaged.

### TIP
It is recommended to enter the search term "Pioneer Smart Sync" in the search field to search for the application.

### Making a connection with Pioneer Smart Sync

1. Connect this unit with the mobile device via Bluetooth.
   - iPhone/Android device via Bluetooth (page 14)
   Pioneer Smart Sync on the iPhone/Android device starts automatically.

### NOTE
[APP CTL] needs to be set to [BT] in the SYSTEM settings to connect to the Pioneer Smart Sync automatically (page 22).
Pioneer Smart Sync connection via wired connection

You can also make the Pioneer Smart Sync connection via USB connection.

1. Press and hold \(\text{\textbullet}\) to display the main menu.
2. Press \(\triangleright\) to select [SYSTEM], then press \(\text{\textbullet}\) to confirm.
3. Press \(\triangleright\) to select [APP CTL], then press \(\text{\textbullet}\) to confirm.
4. Press \(\triangleright\) to select [WIRED], then press \(\text{\textbullet}\) to confirm.

Pioneer Smart Sync on the iPhone/Android device starts automatically.

NOTES
- If Pioneer Smart Sync has not been installed on your iPhone/Android device yet, a message that prompts you to install the application will appear on your iPhone/Android device.
- When you connect a mobile device other than an iPhone/Android device, it may not operate correctly depending on your mobile device.
- To connect to the Pioneer Smart Sync manually, press and hold \(\text{\textbullet}\).

Listening to music on your device

1. Press \(\triangledown\) to select [APP].

Parking Sensor

A separately sold parking sensor (e.g. ND-PS1) is required to utilize the parking sensor function which includes features indicates the distance from objects by sound and unit display colours.

Sensor functions

NOTE
The parking sensor function is only available when the gear shift is in the REVERSE (R) position and [SENSOR] is set to [Y] in the P SENSOR settings (page 24).

<table>
<thead>
<tr>
<th>Distance to the objective</th>
<th>Unit display colour and warning sound</th>
</tr>
</thead>
<tbody>
<tr>
<td>More than 160 cm (More than 60 in.)</td>
<td>Green with no sound</td>
</tr>
<tr>
<td>160 cm to 90 cm (60 in. to 40 in.)</td>
<td>Yellow with a slow intermittent beep sound</td>
</tr>
<tr>
<td>90 cm to 40 cm (40 in. to 20 in.)</td>
<td>Orange with an intermittent beep sound</td>
</tr>
<tr>
<td>Less than 40 cm (Less than 20 in.)</td>
<td>Red with a continuous beep sound</td>
</tr>
</tbody>
</table>

TIP
- The shortest distance in the detected distance range is applied on the unit’s indicator.
• The left/right illumination on the unit shows the distance between the two sensors on the left/right sides and the object.
• The colour of the illumination displays the shorter distance of one of the two sensors.

## Settings

You can adjust various settings in the main menu.

**NOTE**
The setting operation from this unit is not available when Pioneer Smart Sync is connected.

1. Press and hold \( \text{[ ]} \) to display the main menu.

2. Press \( \text{[ ]} \) to select one of the categories below, then press \( \text{[ ]} \) to confirm.
   - FUNCTION settings (page 20)
   - AUDIO settings (page 21)
   - SYSTEM settings (page 22)
   - ILLUMINATION settings (page 24)
   - PSENSOR settings (page 24)

3. Press \( \text{[ ]} \) to select the options, then press \( \text{[ ]} \) to confirm.

### FUNCTION settings

The menu items vary according to the source.

<table>
<thead>
<tr>
<th>Menu Item</th>

### Additional Information

#### Troubleshooting

- **The display automatically returns to the normal display.**
  → No operations have been made for about 30 seconds.
  → Perform an operation.

- **The sound is intermittent.**
  → You are using a device, such as a cellular phone, that may cause audible interference.
  → Move electrical devices that may be causing the interference away from the unit.

- **The sound from the Bluetooth audio source is not played back.**
  → There is a call in progress on a Bluetooth-connected cellular phone.
  → The call will be played back when the call is terminated.
  → A Bluetooth-connected cellular phone is currently being operated.
  → Stop using the cellular phone.
  → The connection between the unit and the cellular phone is not established correctly after a call made by a Bluetooth-connected cellular phone.
  → Make a Bluetooth connection between the unit and the cellular phone again.

#### Error messages

### Common

- **AMP ERR**
  → This unit fails to operate or the speaker connection is incorrect.
  → The protective circuit is activated.
  → Check the speaker connection.

- **NO XXXX** (NO TITLE, for example)
  → There is no embedded text information.
  → Switch the display or play another track/file.

- **USB device/iPhone**

  **READING**
  → Sometimes there is a delay between the start of playback and when you start to hear any sound.
  → Wait until the message disappears and you hear sound.

  **NO AUDIO**
  → There are no songs.
  → Transfer the audio files to the USB device and connect.
  → The connected USB device has security enabled.
  → Follow the USB device instructions to disable the security.

  **SKIPPED**
  → The connected USB device contains DRM protected files.
  → The protected files are skipped.

- **PROTECT**
  → All the files on the connected USB device are embedded with DRM.
  → Replace the USB device.

- **N/A USB**
  → The connected USB device is not supported by this unit.
  → Disconnect your device and replace it with a compatible USB device.

- **Turn the ignition switch OFF and back to ON again. If the message remains, contact your dealer or an authorized Pioneer Service Station for assistance.**

- **Check the speaker connection.**

- **Wait until the message disappears and you hear sound.**

- **Transfer the audio files to the USB device and connect.**

- **Follow the USB device instructions to disable the security.**

- **Replace the USB device.**

- **Disconnect your device and replace it with a compatible USB device.**
HUB ERR
→ The USB device connected via a USB hub is not supported by this unit.
  – Connect the USB device directly to this unit using a USB cable.

CHECKUSB
→ The USB connector or USB cable has short-circuited.
  – Check that the USB connector or USB cable is not caught in something or damaged.
→ The connected USB device consumes more than maximum allowable current.
  – Disconnect the USB device and do not use it. Turn the ignition switch OFF and back to ACC or ON. Connect only compliant USB devices.
→ The iPhone operates correctly but does not charge.
  – Make sure the connection cable for the iPhone has not shorted out (e.g., not caught in metal objects). After checking, turn the ignition switch OFF and back to ON, or disconnect the iPhone and reconnect.

ERROR-19
→ Communication failed.
  – Perform one of the following operations, then return to the USB source.
    • Turn the ignition switch OFF and back to ON.
    • Disconnect the USB device.
    • Change to a different source.
→ iPhone failure.
  – Disconnect the cable from the iPhone. Once the iPhone’s main menu is displayed, reconnect the iPhone and reset it.

ERROR-23
→ USB device was not formatted properly.
  – Format the USB device with FAT12, FAT16 or FAT32.

ERROR-16
→ The iPhone firmware version is old.
  – Update the iPhone version.
→ iPhone failure.
  – Disconnect the cable from the iPhone. Once the iPhone’s main menu is displayed, reconnect the iPhone and reset it.

STOP
→ There are no songs in the current list.
  – Select a list that contains songs.

NO DEV
→ No Bluetooth device found.
  – Connect the unit and iPhone via Bluetooth (page 14).

CN FAIL
→ Bluetooth connection with iPhone failed.
  – Make a connection again on the mobile device.

DISCNCT
→ Bluetooth connection lost.
  – Make a connection again on the mobile device.

Bluetooth device

ERROR-10
→ The power failed for the Bluetooth module of the unit.
  – Turn the ignition switch OFF and back to ACC or ON.

APP

CNCT APP
→ Pioneer Smart Sync connection is not made.
  – Make a connection with Pioneer Smart Sync (page 16).
Handling guidelines

USB storage device
- Connections via USB hubs are not supported.
- Firmly secure the USB storage device before driving. Do not let the USB storage device fall onto the floor, where it may become jammed under the brake or accelerator pedal.
- Depending on the USB storage device, the following problems may occur.
  - Operations may vary.
  - The storage device may not be recognized.
  - Files may not be played back properly.
  - The device may cause audible interference when you are listening to the radio.

iPhone
- Do not leave the iPhone in places with high temperatures.
- Firmly secure the iPhone when driving. Do not let the iPhone fall onto the floor, where it may become jammed under the brake or accelerator pedal.
- Incompatible text saved on the iPhone will not be displayed by the unit.

Compressed audio compatibility
- Only the first 32 characters can be displayed as a file name (including the file extension) or a folder name.
- The unit may not work properly depending on the application used to encode WMA files.
- There may be a slight delay at the start of the playback of audio files embedded with image data, or audio files stored on a USB device with numerous folder hierarchies.

⚠ CAUTION
- Pioneer cannot guarantee compatibility with all USB mass storage devices, and assumes no responsibility for any loss of data on media players, smartphones, or other devices while using this product.
- Do not leave a USB storage device in any place that is subject to high temperatures.

WMA files

</tr>
<tr>
<td>Channel mode</td>
<td>1/2 ch</td>
</tr>
</tbody>
</table>

USB device

- There may be a slight delay when starting playback of audio files on a USB storage device with numerous folder hierarchies.

<table>
<thead>
<tr>
<th>Playable folder hierarchy</th>
<th>Up to eight tiers (A practical hierarchy is less than two tiers.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Playable folders</td>
<td>Up to 1 500</td>
</tr>
<tr>
<td>Playable files</td>
<td>Up to 15 000</td>
</tr>
<tr>
<td>Playback of copyright-protected files</td>
<td>Not compatible</td>
</tr>
<tr>
<td>Partitioned USB device</td>
<td>Only the first partition can be played.</td>
</tr>
</tbody>
</table>

iPhone compatibility

This unit supports only the following iPhone models. Older versions may not be supported.

Made for
- iPhone X
- iPhone 8
- iPhone 8 Plus
- iPhone 7
- iPhone 7 Plus
- iPhone SE
- iPhone 6s
- iPhone 6s Plus
- iPhone 6
- iPhone 6 Plus
- iPhone 5s

- Operations may vary depending on the generation and/or software version of the iPhone.
- Users of iPhone with the Lightning® Connector should use the Lightning to USB Cable (supplied with iPhone).
- Refer to the iPhone manuals for information about the file/format compatibility.
- Audiobook, Podcast: Compatible

⚠️ CAUTION

Pioneer accepts no responsibility for data lost on the iPhone, even if that data is lost while this unit is used.

Sequence of audio files

The user cannot assign folder numbers and specify playback sequences with this unit. Sequence of audio file depends on the connected device. Note that the hidden files in a USB device cannot be played back.
Example of a hierarchy

![Hierarchy Diagram]

01 to 05: Folder number
① to ⑥: Playback sequence

Phase: Normal/Reverse
Speaker level: +10 dB to –24 dB (1 dB step)
Time alignment: 0 Inch to 140 Inch (1 inch/Step)

USB
USB standard specification: USB 2.0 full speed
Maximum current supply: 1.5 A
USB Protocol:
  MSC (Mass Storage Class)
  AOA (Android Open Accessory) 2.0
File system: FAT12, FAT16, FAT32
MP3 decoding format: MPEG-1 & 2 Audio Layer 3
WMA decoding format: Ver. 7, 8, 9, 9.1, 9.2 (2 ch audio)
AAC decoding format: MPEG-4 AAC (iTunes encoded only) (Ver. 10.6 and earlier)
FLAC decoding format: v1.2.1 (Free Lossless Audio Codec)
WAV signal format: Linear PCM (Non-compressed)

FM tuner
Frequency range: 87.9 MHz to 107.9 MHz
Usable sensitivity: 11 dBf (1.0 μV/75 Ω, mono, S/N: 30 dB)
Signal-to-noise ratio: 65 dB (IHF-A network)

AM tuner
Frequency range: 530 kHz to 1 710 kHz
Usable sensitivity: 25 μV (S/N: 20 dB)
Signal-to-noise ratio: 60 dB (IHF-A network)

Bluetooth
Version: Bluetooth 4.0 certified
Output power: +4 dBm Maximum (Power class 2)
BLE (Bluetooth Low Energy) Version: 4.0 certified
BLE (Bluetooth Low Energy) Output power: +3 dBm Maximum
Frequency band(s): 2 400 MHz to 2 483.5 MHz
Bluetooth profiles:
  GAP (Generic Access Profile)
  SDAP (Service Discovery Application Profile)
  HFP (Hands Free Profile) 1.6
  PBAP (Phone Book Access Profile)
  A2DP (Advanced Audio Distribution Profile)
  AVRCP (Audio/Video Remote Control Profile) 1.5
  SPP (Serial Port Profile) 1.1

CTA2006 Specifications

Power output: 14 W RMS × 4 Channels (4 Ω and ≤ 1 % THD+N)
S/N ratio: 91 dBA (reference: 1 W into 4 Ω)
