Basic Hardware buttons

1. **MENU button**
   - Press to display "Top Menu".

2. **MAP button**
   - Press to view the map screen.

3. **MULTI-CONTROL**
   - Rotate to adjust the AV (Audio and Video) volume.
   - On the map screen, move up or down to change the map scale. Move left or right to skip backward or forward the track or chapter, etc.
   - Pressing the center enables you to start the voice operation.

Note: These are just a couple of examples.

Switching the screen

Search function overview
This navigation system provides multiple search methods.

1. Searching for location by address
2. Searching for a place from stores, restaurants, and other businesses in the points of interest database
3. Selecting your stored location
4. Selecting a destination you searched for recently
5. Selecting a route from a stored route
6. Searching for POIs by using the data on external storage (USB, SD)
7. Viewing the current route information, searching for a destination by latitude and longitude and storing the current route
8. Set a route to your home
9. Viewing the information on MSN Direct™
10. Canceling your current route

Searching for your destination by address

1. Display Destination Menu and touch Address.
2. Input the information that you want to set as the destination.

   - Touching the item next to each option displays the screen to enter the character or select one of options. After narrowing down your destination, "Map Confirmation screen" will appear.

3. Touch Route....

When route calculation is completed, navigation guidance begins.

This navigation system gives you route guidance both visually and by voice.

Setting the voice guidance volume

1. Touch the keys in the following order in Top Menu; Settings → Nav Settings → Sound Settings
2. Touch or drag the slider.
Basic operation on the map screen

Basic items on the map

1 Connect your iPod.
2 Switch the AV source to iPod.

Playing your Apple iPod
You can control an iPod by connecting the USB interface cable for iPod (CD-IU230V) (sold separately) to the navigation system.

Selecting the AV source
1 Display “AV Source” menu and touch the key to select your desired AV source.

Playing files from a SD memory card
You can play an audio and video file on a SD memory card.

Scrolling the map
Dragging the map allows scrolling. The scroll speed will change depending on your drag speed.

Pairing your phone
