Pioneer Car Electronics HOW TO:
How to turn off AVICSYNC connected navigation services to restore
Android Auto™ functionality.

Applicable Models:
AVIC-8200NEX / AVIC-8100NEX
AVIC-7200NEX / AVIC-7100NEX

Step 1: Confirm AVICSYNC connected navigation services mode is turned on.

Connect your Android smartphone via USB to the Pioneer NEX receiver. If a pop-up message appears on your smartphone regarding AVICSYNC or NavFusion press cancel.

Press the MAP key on the Pioneer NEX receiver. The Pioneer built-in navigation map screen should appear.
Step 1: Confirm AVICSYSYNC connected navigation services mode is turned on. (continued)

In the lower right hand screen, confirm the color of the AVICSYSYNC icon.
(as shown in the blue circle to the right)

- Green indicates that AVICSYSYNC is turned on. Android Auto is not available - continue to step 2.
- Gray indicates that AVICSYSYNC is turned off. Android Auto is available - skip to step 3.

Step 2: Turn off AVICSYSYNC.

Press the AVICSYSYNC icon.

If a confirmation prompt appears, press “Yes” to turn off AVICSYSYNC.

The AVICSYSYNC icon will change to gray color to indicate that it is now off.
Step 3: Confirm Android Auto functionality has been restored.

After a few seconds, Android Auto will launch automatically.

If Android Auto does not automatically launch, press the “Home” key to return to the home screen and then the Android Auto key in the upper left to launch Android Auto.
