

Recordable DVD Media for Select Pioneer Recording Drives

Many manufacturers offer a variety of DVD disc formats and speeds. Pioneer is working closely with these manufacturers to increase performance and the number of media types that are compatible with our writers. Pioneer has not determined the compatibility of media from manufacturers other than those included in this document. Please consult your media manufacturer for more information.

This document provides a brief summary of the media manufacturers that Pioneer tested and determined to be compatible with the DVD recording writers listed below.

- DVR-115D DVD Writer – Dual (PATA)
- DVR-115 DVD Writer – Multi (PATA)
- DVR-215D DVD Writer – Dual (SATA)
- DVR-215 DVD Writer – Multi (SATA)

Test results show that these drives can write speeds exceeding that of the media's rating. However, this list does not guarantee that a drive will write at the maximum speed in all situations. Speeds are dependent upon factors such as drive firmware versions, operating system levels, and environmental conditions.

Note: Drive firmware updates often include support for additional manufacturers' media or higher media speeds so regularly check the [Pioneer Electronics](http://www.pioneerelectronics.com/pna/article/top/0..2076_4273.00.html) website for drive [Firmware](#) updates.
