The Pioneer VSX-932 brings out the full excitement from everything you see and hear, with DTS:X® and Dolby Atmos® featuring the Reflex Optimizer for Atmos-enabled speakers, Ultra HD video, HDR10, HLG (Hybrid Log-Gamma), and Dolby Vision™. Stream music to any room with FlareConnect™*, Chromecast built-in, and DTS Play-Fi®. Listen to a multitude of songs via internet radio and network streaming services, with smooth control on the Pioneer Remote App. You can even connect a turntable via the phono input.
Multi-Dimensional Excitement with Dolby Atmos®

The VSX-932 is compatible with 5.2.2-channel configuration of the latest theater sound platform, Dolby Atmos®. You can enjoy an immersive object-oriented sound in smooth, curving movements, or the realistic three-dimensional movement overhead by the top speakers.

Dolby Atmos 5.2.2ch Speaker System

DTS:X®

DTS:X is the next-generation audio codec from DTS that leverages object-based audio to enable new immersive and interactive audio experiences. Since DTS:X can automatically adapt the audio to the existing channels and speaker system, no specific speaker layout is required. Experience an immersive soundscape with incredibly rich and life-like audio.

Next Generation Video Standard Ready

The VSX-932 supports pass-through for HDR10, HLG (Hybrid Log-Gamma), and Dolby Vision signals. By connecting a compatible source device, you can enjoy these latest video standards on a compatible display. What's more, all HDMI terminals support 4K (60/4:4:4/4:2:2/24-bit), Wide Color Gamut (BT.2020), and HDCP 2.2, so you will have no problem when upgrading to new devices, and can also enjoy premium content such as 4K videos with digital copy protection.

Multi-room Audio Offers a Variety of Ways to Enjoy Music

FlareConnect™ shares audio from network and external audio input sources between compatible components. Enjoy effortless multi-room playback of your favorite audio sources from a compatible streaming device, stream from more with supported components and speaker systems. Music selection, speaker grouping, and playback management across the home are built into the Pioneer Remote App®.

* Sharing audio from external inputs is enabled with a future firmware update. External audio inputs supporting FlareConnect may differ depending on model. Please consult individual product specification for more information.

MCACC Auto Room Tuning

Create the optimum acoustic environment with Pioneer’s MCACC (Multi-Channel Acoustic Calibration System), developed in close collaboration of professional recording studios. With the custom microphone, the system automatically compensates for differences in speaker size, level and distance, and equalizes response.

Synchronized Sound with Phase Control

As an innovative solution for the phase lag between the subwoofer and the main channel speakers caused by the bass management filter, Phase Control compensates the delayed bass to improve sound synchronization.

Chromecast built-in

The VSX-932 comes with Chromecast built-in, so you can use your mobile device to stream your favorite music, radio, or podcasts to your speaker. You can control the audio from anywhere in the house using Chromecast-enabled apps running on your personal device—iPhone, iPad, Android phone and tablet, Mac and Windows laptop, and Chromecast®. Discover Chromecast-enabled apps at google.com/cast/apps.
