**PRV-LX1 – Duplicating DVDs Within the Recorder**

---

**OVERVIEW:**

Often PRV-LX1 users want to duplicate an existing DVD or burn an additional copy from a disc-image file stored on the unit's hard disk drive (HDD). The PRV-LX1 is capable of doing either function. Although this information is available in the operating instructions, this document summarizes how to duplicate content from a DVD disc or how to create an image file then burn it to a disc.

*Notice: Copyright-protected content cannot be duplicated or used to create image files. The duplication of copyrighted material requires the permission of the copyright holder and neighboring-rights holder. Failure to obtain permission from each rights holder is punishable by law. Pioneer accepts no liability whatsoever for problems arising between the user of this device and any/all rights holders.*

**TECHNICAL DETAILS:**

A PRV-LX1 with two burner drives (DVD1 and DVD2) is capable of using a simple set of menu commands to duplicate a disc from a master disc. This process only works with two-burner units; the command set is unavailable when using a PRV-LX1 with a single burner. Following sections explain how to duplicate using a single-burner model or burning a DVD from a disc-image file stored on the recorder's HDD.

***To duplicate a DVD using a two-burner recorder:***

- 1) Power ON the PRV-LX1 and wait for the recorder to become ready.
- 2) Open both drive trays by pressing the eject button to the right of each tray.
- 3) Place your master DVD in one of the burner trays and a blank disc in the other tray.  
*It is easiest to place your master in DVD1 and the blank disc in DVD2.*
- 4) Close both trays by pressing each eject button again.
- 5) Press the **Function** button to open the recorder's main Menu.
- 6) Use the arrow buttons to highlight the **APP** menu then press the **ENTER** button.
- 7) Highlight the **Copy/Impt/Bkup** menu option then press **Enter**.
- 8) With **Disc Copy** highlighted, press the right arrow button twice to select the **Source** drive.  
*The Source is the drive containing your master disc.*
- 9) Use the drop-down option to select the drive containing your master DVD then press **ENTER**.

- 10) Arrow back, down, and right to select the other drive as the **Destination** burner, pressing **ENTER** to confirm your selection.
- 11) Arrow back and down to the **Copy** button at the bottom of the sub-menu window then press **ENTER** to begin burning the copy of your master disc.
- 12) Press **ENTER** (YES is highlighted automatically) when asked to confirm the copy.
- 13) Only remove both your master disc and the copied disc after the PRV-LX1 display shows that the process is complete.

**To Create a Disc Image file on the recorder's HDD:**

- 1) Power ON the PRV-LX1 and wait for the recorder to become ready.
- 2) Open a drive tray by pressing the eject button to the right of the tray.  
*When working with a PRV-LX1 with two burner drives, use either tray.*
- 3) Place your master DVD in the burner tray.
- 4) Press the eject button to close the tray.
- 5) Press the **Function** button to open the recorder's main Menu.
- 6) Use the arrow buttons to highlight the **APP** menu then press the **ENTER** button.
- 7) Highlight the **Copy/Impt/Bkup** menu option then press **Enter**.
- 8) Arrow down to highlight the **Disc Image Copy** menu.
- 9) With **Disc Image Copy** highlighted, press the right arrow button twice to select the **Source** drive.  
*The Source is the drive containing your master disc.*
- 10) Use the drop-down option to select the drive containing your master DVD then press **ENTER**.
- 11) Arrow back and down to highlight **Input Image Name**.
- 12) Arrow right to open the file-naming window then press **ENTER** to accept the default name.  
*To enter a different name, please refer the operating instructions, Page 94.*
- 13) Arrow back and down to the **Copy** button at the bottom of the sub-menu window then press **ENTER** to begin burning the copy of your master disc.
- 14) Press **ENTER** (YES is highlighted automatically) when asked to confirm the copy.
- 15) Only remove your master disc after the PRV-LX1 display shows that the process is complete.

**To Burn a Disc from a Disc Image file on the recorder's HDD:**

- 1) Power ON the PRV-LX1 and wait for the recorder to become ready.
- 2) Open a drive tray by pressing the eject button to the right of the tray.  
*When working with a PRV-LX1 with two burner drives, use either tray.*
- 3) Place your blank disc in the burner tray.
- 4) Press the eject button to close the tray.
- 5) Press the **Function** button to open the recorder's main Menu.
- 6) Use the arrow buttons to highlight the **APP** menu then press the **ENTER** button.
- 7) Highlight the **Copy/Impt/Bkup** menu option then press **Enter**.
- 8) Arrow down to highlight the **Image Copy/Del** menu.
- 9) With **Image Copy/Del** highlighted, press the right arrow button twice to select the **Source** image.  
*The Source is the disc image file you stored on the recorder's HDD.*
- 10) Use the drop-down option to select your Source Image then press **ENTER**.
- 11) Arrow back, down, and right to select the **Destination** burner containing your blank disc, pressing **ENTER** to confirm your selection.
- 12) Arrow back and down to the **Copy** button at the bottom of the sub-menu window then press **ENTER** to begin burning your image file to the disc.  
  
*Notice: Disc image files that are 4.7GB or larger cannot be copied to a disc by the PRV-LX1.*
- 13) Press **ENTER** (YES is highlighted automatically) when asked to confirm the copy.
- 14) Only remove the disc after the PRV-LX1 display shows that the process is complete.
