The mission for our flagship receiver was simple: the ultimate reproduction of HD audio, which creates surround sound so rich, so dense, no analog amplifier alone can do the job properly. So we created the Hybrid Digital Amplifier. Developed with ICEpower, the leader in digital amplifier design, this breakthrough is at the heart of the SC-09TX. The receiver combines the best of digital and analog technology. It is an achievement that marks a new era in high-definition stereophonic fidelity.
